

large-format screen. The Wash-It sink is made of steel, offers a translucent back window for inspection, and includes two screen racks. Workhorse reports that a light can be mounted on or behind the sink for enhanced visibility. A rack for up to eight squeegees is optional.

DUBUIT INKS

DUBUIT INTRODUCES EVOPANEL UV SCREEN INKS

encresdubuit.com

Dubuit has added Evopanel Inks, a line of UV screen inks for industrial applications such as automotive, aerospace, medical devices, overlays, and membrane switches. The ink is NVP-free and compatible with most adhesives, according to the company. Dubuit also reports that the black Evopanel is extremely opaque and flexible. The line is designed to withstand high temperatures for in-mold applications. It can also be printed on polycarbonate and treated polyester.

MHM

MHM OFFERS COMPACT AUTOMATIC GARMENT PRESS

mhmscreenprinting.com | hsi.us

The new X-Type Plus automatic garment screen printing press, manufactured by MHM and available in the US exclusively through Hirsch, is designed to offer the speed and automation features of the company's larger presses in a compact unit with a diameter just over 12 ft. The AC-driven indexer can be operated in either direction and reportedly delivers smooth print strokes at all speeds and pressure settings. The X-Type Plus uses MHM's M-Touch pro operating system with an Android tablet interface, giving users access to real-time technical support via a wifi interface. Each station also has its own keypad for making fast adjustments during setup. The press is available in 6-, 8-, 10-, and 12-color models with a standard 16 x 20-in. print area; an LS version with an 18 x 22-in. print area is also available.

ITI REVEALS HIGH-SPEED FABRIC PRINTER

inkjettechnology.net

Inkjet Technology Inc. (ITI) has released the ITI3200-TXK dual-production textile printer, which incorporates a new media handling system that accommodates both transfer paper and direct-to-fabric printing using a single inkset. The machine spans 126 in. and is available with either two or four Kyocera KJ4B printheads, reaching speeds up to 2195 sq ft/hr.

An internal, bottom-mounted heater for direct-to-fabric applications is optional. Additional features include an internal vacuum system to hold down thin media and prevent it from wrinkling, and an ink collection gutter assembly for printing on polyester and other mesh-like textiles.

TEKRA ADDS 15-MIL BACKLIT FILM

tekra.com

Tekra has added 15-mil JetView Latex White Translucent Matte/Gloss Backlit Polycarbonate film. The material is a sturdier alternative to the company's

TEKRA

8- and 10-mil options. Tekra reports that the film offers high ink adhesion and a light transmission of 32.5%, reducing hot spots when backlit. Available in 53-in. widths.

INTERNATIONAL COATINGS INTRODUCES GLOW-IN-THE-DARK INK

iccink.com

International Coatings has released Axeon Glow-in-the-Dark 1808, a

non-PVC, non-phthalate screen printing ink that produces a bright, greenish glow when exposed to light and then viewed in a darkened area. The ink can be used on its own or in conjunction with other inks to produce a "glow" effect.

NEW 3M PRINT WRAP FILM

3M.com

3M's new line of print wrap film, 3M Print Wrap Film LJ180mC-10, is designed for applications on vehicles, boats, walls, and more. 3M reports the film's advanced slideability and initial tack

THE SAFE, EFFECTIVE, LOW ODOR SOLUTION
